## Summary

---

Experienced Front-End Developer specializing in building responsive, scalable, and user-centric web applications using **React.js** and **Next.js**. Proficient in **state management** (Redux Toolkit, Zustand), **API integration**, and leveraging **modern UI frameworks** to create seamless digital experiences. Skilled at transforming creative designs into **pixel-perfect**, functional interfaces with a strong focus on performance and maintainability. Adept at collaborating in **Agile environments**, delivering **clean, modular, and high-quality code** for SaaS products and other complex web applications.

## Technical Skills

---

**Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap 5, Sass

**UI libraries :** MUI , Shadcn UI , Chakra UI , Material Tailwind

**Developer Tools:** Git/GitHub, VS Code, Postman, Swagger, Vercel, Cloud Platforms, Slack, Bordio

**Deployment:** Vercel and Cpanel

## Experience

---

### PhpTravels

May 2025 – Present

*Frontend Team lead*

- Leading the front-end development team, overseeing feature implementation and UI/UX consistency across Multiple Projects).
- Managing deployments across multiple client instances using **cPanel** and **Vercel**, ensuring smooth and reliable production releases.
- Overseeing GitHub repositories and the **entire build and release process**, including version control and code reviews.
- Training and mentoring multiple trainees, guiding them through best practices in modern React, Next.js, and project workflows.
- **Tech Stack:** Next.js, React.js, Context Api/Redux Toolkit, React Query, framer motion , Tailwind CSS, REST APIs

### VeevoTech

Jan 2024 – May 2025

*Frontend Developer*

- Contributed to multiple high-impact SaaS base projects at VeevoTech, including QueryQ, Spext, Shopify Order System, and Order Pulse.
- Work on Query automation, notifications, chat management features and chat filters system for **QueryQ**, improving response times.
- Improved UI/UX consistency and performance with **modular, reusable components** (MVVM architecture).
- Collaborated in Agile teams for modular and scalable frontend architecture.
- **Tech Stack:** React.js, Nodejs, MongoDB Context Api/ Zustand, Axios, framer motion , Tailwind CSS, REST APIs

### National Center of Artificial Intelligence

Sep 2022 – March 2023

*Web Development Intern*

- Gained practical experience in API development, data fetching, and Frontend integration.
- Deepened understanding of data visualization techniques for charts and Google Maps.
- Explored the interaction between Frontend and backend development for building cohesive applications. Enhanced database design skills for efficient data storage and retrieval. Learn how to perform secure authentication and authorization and protecting routes.

## Projects

---

### Top Tier Travels

- Architected the platform from scratch using clean code principles and modular design to ensure long-term scalability and maintainability.
- **Developed Hotels and Tours modules** with advanced search, filtering, on scroll loading and booking features powered by real-time API integrations.
- Implemented **dynamic currency conversion** for automatic, accurate price updates based on selected currencies.
- Integrated **secure Stripe payment processing** to enable seamless and reliable booking transactions.

- Built **automated invoice generation** for instant, professional post-booking receipts.
- Added **multi-language support (50+ languages)** to deliver a personalized and globally accessible user experience.
- **Agent side** : <https://agents.toptiertravel.vip>
- **Customer side**: <https://toptier-tr-ef19.vercel.app>

### QueryQ for Queries management

- Built core modules for centralized business query management, including **chat filtration** (assigned, unanswered, open, closed, hold, priority).
- Integrated **Meta-approved marketing templates** and bulk contact import via Excel for efficient customer management.
- Designed and integrated a notification system and query automation module to keep users informed of new queries and updates.
- **Project Link**: [veevotech.com/queryq](https://veevotech.com/queryq)

### Spext

- Contributed to Spext, an SMS and notification platform (offline network) for businesses.
- Designed and implemented a catalogue module, allowing users to showcase products similar to WhatsApp's catalogue feature .
- Implemented advanced data visualization using interactive charts (pie, line, doughnut, bar) and Google Maps integration for sent , received and failed SMS.
- **Project Link**: [veevotech.com/spext](https://veevotech.com/spext)

### Order System

- Designed and developed a comprehensive order management system. This system streamlines the process of managing orders, providing a user-friendly interface for both customers and administrators.
- This system will manage the order of products and services. It allows users to create, view, and manage their orders efficiently. The system is built with a focus on performance and scalability, ensuring that it can handle a large number of orders without compromising speed or reliability.
- The system includes features such as order creation, order management, and order history, allowing users to track their orders and make changes as needed.
- **Project Link**: <https://afnan-ordersystem.vercel.app/>

## Education

---

### Agriculture University Of Peshawar

*Bachelor of Science in Computer Science*

### Certifications

---

- \* NAVTTC prime minister Web development course Certificate
- \* internship completion Certificate from NCAI UET Peshawar .
